MOLEMAX-Rx Mole Repellent with lawn revitalizer For Quick Recovery of Mole Damaged Lawns. Repel listed pests, Revitalize and Renew your lawn! Effectively rids your lawn, gardens and plantings of Moles, Voles, Gophers, Armadillos, Skunks, Rabbits, Ground Squirrels and other burrowing animals.

MOLEMAX-Rx Mole Repellent with lawn revitalizer is an effective means of repelling burrowing animals from desirable turf and ornamental plantings areas. When used as directed, this product can be safely used around children and pets and will not harm lawns, gardens, flowerbeds or other desirable plants. Use **MOLEMAX-Rx Mole Repellent with lawn revitalizer** for quick recovery of mole damaged lawns, enhanced lawn growth, vigor, green color and thickness.

This product is exempt from registration with the Federal EPA under section 25(b) of FIFRA, and as such, is not registered with the Environmental Protection Agency. Bonide represents that this product and its ingredients qualify for exemption from registration under FIFRA.

Directions for Use

How To Use: Apply 10 lbs. per 10,000 sq. ft. Lightly watering in the granules after application speeds up the release of material and its penetration into the soil, or you can choose to simply wait for the next rainfall. After application, mole, vole & gopher activity may increase, as they leave the treated area. Reapply if you see new activity in mounds and tunnels.

Using a spreader: To apply this product with a spreader, consult spreader setting instructions for your particular spreader. If uncertain about proper spreader setting, begin at the lowest setting that allows the product to flow evenly through the spreader, and apply 10 lbs per 10,000 sq. ft., going over the area to be treated, twice if necessary.

In Florida - Do not exceed 2 applications per year to Centipedegrass; 4 applications per year to Bahiagrass; 5 applications per year to St. Augustinegrass; and 7 applications per year to Bermudagrass or Zoysiagrass.

Use When Planting: For Bulbs: After placing bulb in hole, apply one (1) tablespoon of product into the hole, making sure granules surround the bulb, then backfill with soil. When planting **ornamental flowers** and **shrubs** such as: Roses, Azaleas, Rhododendrons, Mums, etc., apply two (2) tablespoons to the bottom of the planting hole and three (3) to four (4) tablespoons to the soil mix before back filling.

GUARANTEED ANALYSIS

Total Nitrogen (N)	0.7%	0.7-0-0
0.7% Urea Nitrogen		
Calcium (Ca)	10.0%	
Magnesium (Mg)	1.0%	
x.x% Water Soluble Magnesium (Mg)		

Derived from urea and calcium carbonate.

ALSO CONTAINS NON PLANT FOOD INGREDIENT:

1.0% Humic Acids from Leonardite

Purpose: Humic Acids may aid in plant uptake of nutrients

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals>

A lawn will typically utilize 1 to 4 lbs. of nitrogen per 1,000 sq. ft. per growing season. When used as directed, this product will supplement your regular fertilization program by providing 0.7 lb. of nitrogen per 1,000 sq. ft. Please consult your local extension office for questions regarding a regular fertilizer program.
