

# Iron Sulfate 0-0-0

## GUARANTEED ANALYSIS:

Sulfur (S) . . . . . 6%  
6% Combined Sulfur (S)  
Total Iron (Fe) . . . . . 15.00%  
15.00% Water Soluble Iron (Fe)  
Plant Nutrients Derived From: Ferrous Sulfate  
F1290

Bonide's Iron Sulfate helps supply Iron in a readily available form. Bonide's Iron Sulfate works well as an aid to correct Iron deficient soils or when plant symptoms indicate a need for Iron. Use Bonide's Iron Sulfate with Azaleas, Camellias, Citrus and Gardenias. Iron Sulfate can also be used to treat Iron deficiencies in turf.

**Note:** Adding Iron Sulfate to calcareous soils (soils with high levels of limestone) with high pH may not be effective, as these soils may already contain fairly high levels of unavailable Iron which will remain unavailable unless the pH is reduced.

## How to read a fertilizer label.

Fertilizers are rated by three numbers, such as 5-10-5. The numbers tell what percentage of primary nutrients the fertilizer contains. The first number is the percentage of Nitrogen; the second number is the percentage Available Phosphate (P<sub>2</sub>O<sub>5</sub>); the third number is the percentage of soluble Potash (K<sub>2</sub>O).

When purchasing fertilizer, keep in mind that typically the first number, or Nitrogen, emphasizes a green color and denser foliage. The middle number, Available Phosphate, emphasizes the development of flowers, fruits or vegetables. And the third number, Soluble Potash, emphasizes overall plant hardiness and its ability to withstand stress.

## DIRECTIONS FOR USE

Apply Only as Directed. Wash off any plant food which accidentally gets on foliage.

Apply Bonide's Iron Sulfate in spring or early summer. Repeat application in 6-8 weeks, as needed, to correct iron deficiency and promote dark green color. This product should be used to supplement a regular fertilization program.

**Flowers and Vegetables:** Apply Bonide's Iron Sulfate at the rate of 4.5 oz. (2 Tbs.) per 100 sq. ft. (10' x 10'). Blend into the soil and water thoroughly.

**For Trees and Shrubs:** Dissolve 1/4 to 1/2 oz. (1/2-1 tsp.) of Bonide's Iron Sulfate in one gallon of water and apply to the soil along the drip line. Water thoroughly.

**Lawns:** Dissolve 2 cups of Bonide's Iron Sulfate in three gallons of water per 1000 (50' x 20') square feet of lawn. Water thoroughly.

**CAUTION:** Bonide's Iron Sulfate is not recommended for potted or container grown plants. This product could stain concrete surfaces such as driveways or sidewalks. Wash or sweep from concrete surfaces immediately after application.

Information concerning the raw materials composing this product can be obtained by writing to the Guarantor listed on this container, and referring to the batch number found on this container.

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.htm>

## FOLLOW DIRECTIONS CAREFULLY.

Timing and method of application, weather and crop conditions, mixture with other chemicals not specifically recommended and other influencing factors in the use of this product are beyond the control of the manufacturer. Buyer assumes all risks of use, storage and handling of this product.

## Store in a dry place.

### MANUFACTURER'S STATEMENT:

This product conforms to the Guaranteed Analysis on the label. Manufacturer's directions regarding use of this product are based upon tests believed to be reliable. All statements made concerning this product apply only when used as directed under normal use conditions. This product is sold as is. Manufacturer makes no warranties, express or implied. In no event shall manufacturer be liable for special, indirect, incidental or consequential damages of any kind.

**CAUTION:** Keep this product out of the reach of children. Keep from contact with eyes, cuts or sores. Wash hands after use. Not for human consumption.

**NOTE:** This product is sold by weight, not volume. Settling may occur during shipment.
